

Cyber-CHAMP[®]

Competency Health And Maturity Progression Cyber Workforce Assessment

Not sure where to start improving your organization's cybersecurity program? Cybersecurity work-roles, along with the associated Tasks, Skills, and Knowledge are unique to every position. This complicates any organization's ability to achieve the proper level of

operational readiness for detecting, handling, responding to, and mitigating cybersecurity vulnerabilities. Possessing this capability is more critical today than ever. Cyber-CHAMP[®] helps organizations pinpoint exactly where to start improving their cybersecurity program

using a step-by-step process that identifies the current cybersecurity posture, areas for improvement, and training paths that lead an organization to higher, measurable levels of cyber competency and maturity. This model can be applied to any role in any company or organization.

Benefits of Cyber-CHAMP[®]

1. Reduce organizational cyber risk
2. Increase business resilience
3. Increase cybersecurity operational readiness
4. Minimize supply-chain risk
5. Achieve desired security maturity level
6. Increase ability to obtain and maintain a cyber workforce.
7. Develop and manage training profiles
8. Maximize insurability
